Figure Index — 40 Original Diagrams

This volume is one of 28 course books that together cover the whole MSc Marriage and Family Therapy taught programme. Each book is written to carry a 14–16 week semester on its own: every week pairs a core idea with the practice that follows from it, a worked case, and a reflective task, and each book closes with an integration chapter, a glossary and a self-assessment paper with model answers.

The books are designed to be read straight through before the semester begins, revisited week by week, and used again in revision. Cross-references point to the other volumes where a topic is treated in more depth.

A note on the case material

All families, couples and individuals in this book are fictional composites. They are written to teach pattern recognition, not to describe any real person. Nothing here replaces supervised clinical practice, professional registration, legal advice or medical care; legal content is orientation only and must be checked against the law of the relevant jurisdiction.

The lecture library

Twenty-eight self-contained course books carry the taught programme: eight in Semester One, seven in Semester Two, seven in Semester Three including the thesis, and six electives. The volume you are holding is marked in the margin.

Reusing the figures 7

All figures are SVG in `assets/figures/`, generated by `scripts/build_figures.py`. They are original work (no stock photography, no third-party licences), scale to any size, print cleanly, and can be recoloured or translated by editing the script.

To embed a figure in a slide deck: insert the `.svg` directly (PowerPoint 2016+ and Keynote both accept SVG), or export a PNG at the size you need.

Reusing the figures

```
import sys; sys.path.insert(0, "scripts")
from figs_theory import fig04
fig04().save("my-genogram.svg")
```

Colours are defined at the top of `scripts/figstyle.py` (`TEAL`, `ROSE`, `AMBER`, `PLUM`, `BLUE`, `GREEN`, `SLATE`). Change them once and every figure in the library follows, which is how you adapt the set to an institution's brand without redrawing anything.
