PROGRAMME

For students and lecturers read before the semester

> This gallery shows every diagram in the library with a one-line description and the books that use it.

One of four programme documents that frame the 28-volume lecture library: the student handbook, the lecturer's teaching and assessment guide, the figure index and the visual figure gallery.

Figure Gallery All 40 Diagrams

This volume is one of 28 course books that together cover the whole MSc Marriage and Family Therapy taught programme. Each book is written to carry a 14 16 week semester on its own: every week pairs a core idea with the practice that follows from it, a worked case, and a reflective task, and each book closes with an integration chapter, a glossary and a self-assessment paper with model answers.

The books are designed to be read straight through before the semester begins, revisited week by week, and used again in revision. Cross-references point to the other volumes where a topic is treated in more depth.

A note on the case material

All families, couples and individuals in this book are fictional composites. They are written to teach pattern recognition, not to describe any real person. Nothing here replaces supervised clinical practice, professional registration, legal advice or medical care; legal content is orientation only and must be checked against the law of the relevant jurisdiction.

The lecture library

Twenty-eight self-contained course books carry the taught programme: eight in Semester One, seven in Semester Two, seven in Semester Three including the thesis, and six electives. The volume you are holding is marked in the margin.

Anxiety about abandonment and avoidance of closeness combine into recognisable strategies

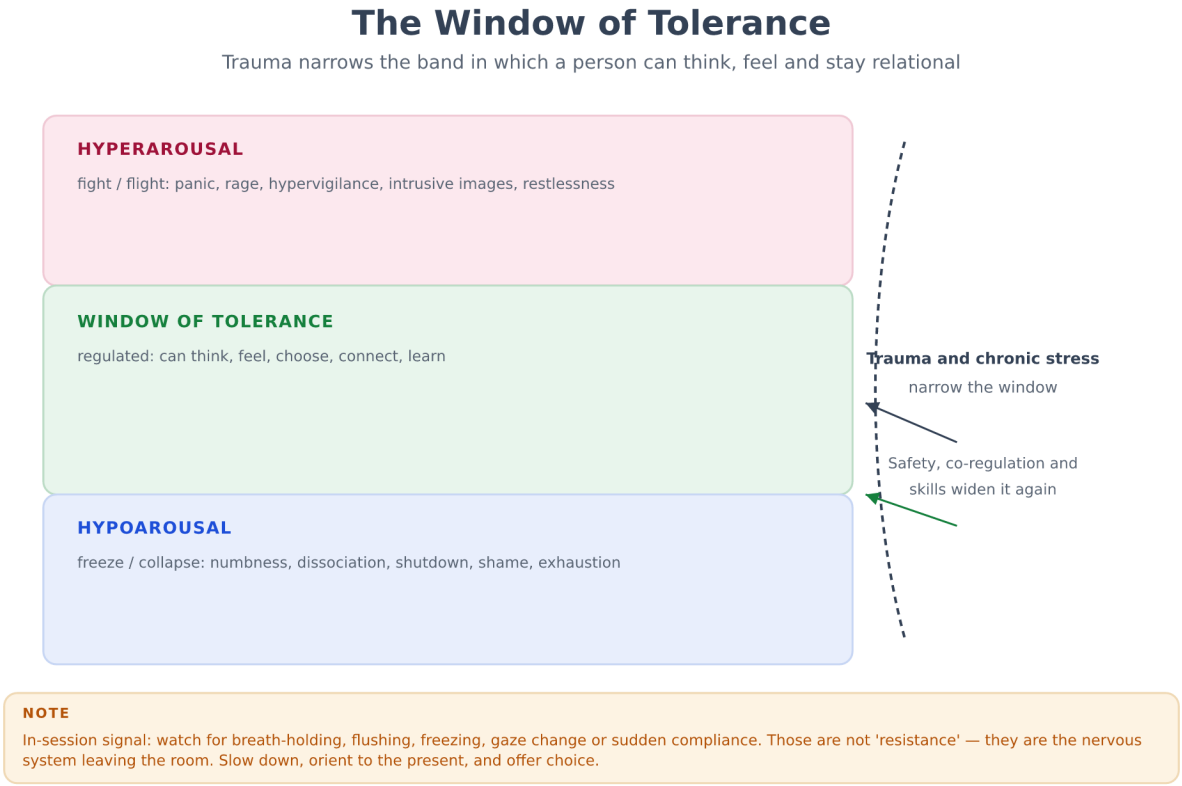

NOTE

Attachment is a pattern, not a personality type. The same person can be secure with a sibling and anxious with a partner, and patterns shift with context, therapy and a safe relationship. Assess the pattern, then ask what it protects.
